DETAILED ACTION

1. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation “either an outward or inwardly facing rounded edge” is inconsistent with the disclosure. The disclosure show that there are ribs in both types. Does applicant means “each of said ribs having either an outward or inwardly facing rounded edge”.

2. Claims 1-4, and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ota (5238129) or in the alternative, over Ota in view of Collette et al. (4863046). Ota teaches plastic container with having a body portion with rectangular sidewalls and a base wherein the body portion comprises a label mounting area, on at least two of the rectangular sidewall, extending between the upper bumper 200 and a lower bumper 100. The mounting area comprising: a rectangular vacuum panel 13, and a plurality of ribs 9 within each panel the ribs are parallel to each other and the non rounded base and extend from one side of the rectangular panel to the other. Each of the ribs 9 having rounded edge as shown in top down.

In the alternative, it is noted that Collette teaches similar ribs with inwardly facing rounded edge at portion 72 as shown in Fig. 10. It would have been obvious to one of ordinary skill in the art to use the ribs in Ota as taught by Collette.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ota in view of Sugiura et al. (5381910). To the degree it is argued that Ota does not teach the ribs having rounded ribs, Sugiura teaches that it is known in the art to provide ribs 23 facing inward and ribs 21 facing outward as shown in Fig. 6. It would have been obvious to one of ordinary skill in the

Art Unit: 3727

art to provide the ribs as taught by Sugiura to provide alternative rib structures. It is noted that the ribs in Sugiura would meet the limitations "at least one rib is inwardly facing and the edges of the remaining ribs are outwardly facing".
